1. Introduction

This document outlines the test results for the products listed on the Print Shop page. A total of **175 test cases** were executed during functional, regression, and user interface testing. The testing was focused on the cart functionality, pricing updates, and general product behavior.

Out of the **175 test cases**, **12 bugs** were identified. This report summarizes the testing process, defects found, and recommendations.

2. Scope of Testing

The scope of the testing process included:

- Functional Testing: Ensuring correct product functionality on the shop pages.
- UI/UX Testing: Verifying that product pages display properly across different devices.
- Cart Testing: Ensuring that products are correctly added to the cart with updated pricing.
- Pricing Conditions: Checking for correct price updates based on selected configurations.
- Regression Testing: Ensuring that changes or bug fixes did not break existing features.

3. Test Summary

3.1. Test Cases Executed

Total Test Case Planned	Test Cases Executed	Test Cases Passed	Test Cases Failed
175	175	163	12

4. Defect Breakdown

4.1. Defects by Severity

Severity	Number of Bugs	Percentage
Critical	1	8.33%
High	4	33.33%
Medium	5	41.67%
Low	2	16.67%
Total	12	100%

4.2. Defects by Category

Category	Number of Bugs
UI Bugs	3
Cart/Checkout Issues	4
Pricing Calculation	3
Responsiveness Issues	2

5. Visual Representation of Results

5.1. Defects by Severity - Pie Chart

Critical: 8.33%

High: 33.33%

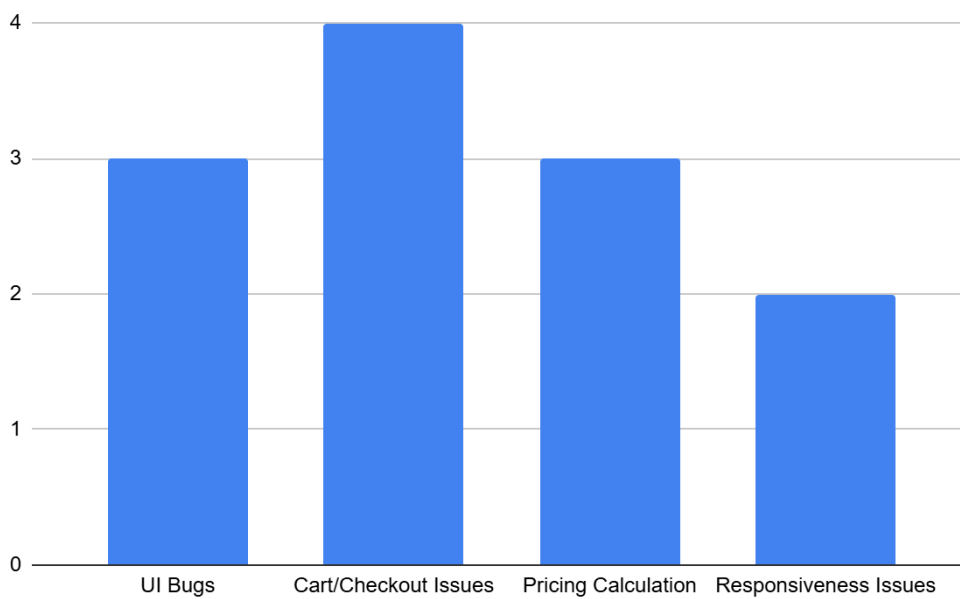

Medium: 41.67%

Low: 16.67%

Number of Bugs

5.2. Defects by Category - Bar Chart

5.3. Test Cases Execution - Line Graph

Total Test Cases Planned = 175

Test Cases Passed = 163

Test Cases Failed = 12

Test Cases Execution

6. Environment

Test Environment	Details
Browser	Chrome, Firefox, Safari
Device	Desktop-Windows, MacBook, and Mobile devices
Operating System	macOS, Windows 11, iOS, Android

7. Conclusion

- A total of 175 test cases were executed, with 12 bugs identified.
- The majority of the defects were of medium severity (41.67%), and there was 1 critical defect related to the cart functionality.
- Several bugs related to pricing and responsiveness need to be addressed before further testing rounds.

It is recommended to fix these bugs and perform regression testing to ensure the stability of the fixes and verify that no new defects have been introduced.
